#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaneki et al (US. Pat. No. 6,568,402) in view of Aronoff et al (US. Pat. No. 5,107,866).

Kaneki et al discloses nearly all that is recited in the claim since it teaches a filter assembly having two cylindrical filter elements arranged, in tandem, each of said elements including a filter material, 41, 42, wrapping material wound around each filter material element, 43, 44, and wrapper paper, 12, wound around the wrapping materials of the two filter elements to connect the two to each other. While there may be no specific discussion of adhesive provided between the wrapping material and the filter, and between the wrapping material and wrapping paper, it follows that one would have applied said adhesive in such manner as to secure the wrapping to the filter elements in order to secure the elements together, as such is well-known – as evidenced by the Aronoff et al reference. Further, it would have been obvious to one having ordinary skill in the art at the time of the invention to have also applied the same adhesive between the two wrapping materials in order to further secure same to ensure the filter elements will be sufficiently positioned during smoking.

***Allowable Subject Matter***

3. Claims 1-3, 6-8, 11-13, and 16-18 are allowed.

***Conclusion***

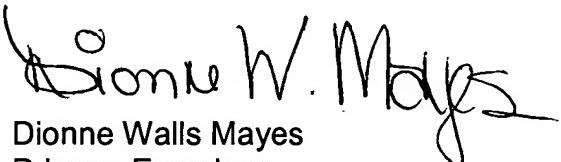

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
